Art Unit: 3723

The US Patent application numbers listed on the 3/10/04 IDS POL-1449 are not prior items and they have therefor been lined through by the examiner

Claims 1-3 and 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 6 it is unclear whether the "fish tape" is part of the claimed combination or not. The claims are therefor indeterminate of scope.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Frank ('821).

In Frank 20 is a line clamp, 32 is a wedge, 36 is a shim, and 34 is an attachment portion capable of connecting the line clamp to an end of a fish tape. The line clamp is seen to be smaller than the size of a line raceway. In any case, a raceway could be found that is larger than the Frank clamp. Statements of intended use have no patentable significance. In any case, the Frank line clamp is capable of performing the recited intended use.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3723

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Frank in view of Schinske.

Schinske teaches that flexible line may be disassembled by using a threaded connection between sections of flexible line.

To provide a threaded connector on the attachment portion of Frank would have been obvious for one skilled in the art at the time the invention was made in view of the disclosure of Schinske. One of ordinary skill in the art would have been motivated to do this in order to provide a convenient means of selectively assembling various lengths of line for convenience.

Claims 4,5, and 10-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention/species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/14/06.
